

## SCO Renewal Training Programme Module 2 – Permit to Work

---

This course will provide engineers with the knowledge and understanding of the permit to work system, specifically in relation to the safe control of operations on the UK gas network. It will provide the necessary training and assessment to achieve SCO unit registration on EUSR

Duration:	1/3 Day in centre (dependant on trainee needs)
Course Space:	8 Trainees
Method of Delivery:	Trainer Led
Who is this for?	All operatives and managers working on operational tasks within the gas networks, as well as specific meter installations, including those designated or expected to become Named Authorising Engineers or Named Competent Persons, is included

### Course Objectives:

- State the purpose of a permit to work and when this type of control should be used
- Recognise the importance of risk assessment to a permit to work
- Identify the key information and process requirements needed for a permit to work
- State the requirements for managing change in relation to a permit to work
- Identify specific permit to work requirements for validity and extension, atmosphere testing, execution, handovers and completion

## Technical Information

Date Produced: April 2026

Pre-requisite Qualifications: SCO Core and PtW must still be in date prior to completion of the training. If qualification expires, initial route must be taken.

Assessment Type: Multi Choice question paper.
