

Energy Efficiency for Domestic Heating

This course prepares installers who hold ACS CCN1 & CEN gas certificates for the major changes in the building regulations which effect the installation of central heating systems.

Duration: 1 Day
Course Space: 6 - 12 Trainees
Method of Delivery: Trainer Led

Who is this for?

- Gas & heating engineers.
- Gas fitters.

Why this course? Comply with current legislations and all safe working practices.

Course Objectives:

- A brief introduction to the changes and the Energy white paper.
- Changes to the building regulations which apply now and those to come.
- The elements of high efficiency system specification boilers.
- Hot water storage and controls
- Water treatment
- Multi-choice question paper

Technical Information

Date Produced: September 2019

Assessment Type: Multi choice question papers.

Qualification required to deliver: Knowledge of all gas procedures and legislation.

Aims: To prepare gas installers for changes in the building regulations which effect the installation of central heating systems. Any replacement or new installation of a central heating boiler must be a SEDBUK A rated boiler along with other measures to improve energy efficiency.
