

SCO Initial Training Programme Module 4 –Routine Operations

This course will provide engineers with the knowledge and understanding of the routine operation procedure, specifically in relation to the safe control of operations on the UK gas network. It will provide the necessary training and assessment to achieve SCO unit registration on EUSR

Duration: ½ Day in centre (dependant on trainee needs)

Course Space: 8 Trainees

Method of Delivery: Trainer Led

Who is this for? All operatives and managers working on operational tasks within the gas networks, as well as specific meter installations, including those designated or expected to become Named Authorising Engineers or Named Competent Persons, is included

Course Objectives:

- State the purpose of routine operation documentation and when this type of control should be used
- Identify, analyse and apply the key information requirements on a routine operation
- State the relevant process, roles and responsibilities for personnel involved in the planning and completion of the routine operation form
- State the relevant process, roles and responsibilities for personnel involved in the planning and execution of the routine operation
- State the relevant process, roles and responsibilities for personnel involved in the management of routine operation works
