

SCO Renewal Training Programme Module 1 – Core

This course will provide engineers with the knowledge and understanding of the core principle of the safe control of operations when working on the UK gas network.

It will provide the necessary training and assessment to achieve SCO unit registration on EUSR

Duration: 1/3 day in centre (dependant on trainee needs)

Course Space: 8 Trainees

Method of Delivery: Trainer Led

Who is this for? All operatives and managers working on operational tasks within the gas networks, as well as specific meter installations, including those designated or expected to become Named Authorising Engineers or Named Competent Persons, is included

Course Objectives:

- Identify the SCO hierarchy of standards, documents and procedures
- State the types of safe systems within the risk hierarchy and risk-based approach to SCO
- Identify the roles and responsibilities of specific individuals within SCO and the importance of communication
- Identify how to monitor risk and manage change
- State how to manage deviations/emergencies
- Identify the requirements for records management, performance review and monitoring audit and review
- Identify SCO competency requirements
- Identify SCO EUSR registration requirements

Technical Information

Date Produced: April 2026

Pre-requisite Qualifications: SCO Core must still be in date prior to completion of the training. If qualification expires, initial route must be taken.

Assessment Type: Multi Choice question paper.
