

## SCO Renewal Training Programme Module 4 –Routine Operations

---

This course will provide engineers with the knowledge and understanding of the routine operation procedure, specifically in relation to the safe control of operations on the UK gas network. It will provide the necessary training and assessment to achieve SCO unit registration on EUSR

Duration: 1/3 Day in centre (dependant on trainee needs)

Course Space: 8 Trainees

Method of Delivery: Trainer Led

Who is this for? All operatives and managers working on operational tasks within the gas networks, as well as specific meter installations, including those designated or expected to become Named Authorising Engineers or Named Competent Persons, is included

### Course Objectives:

- State the purpose of routine operation and when this type of control should be used
- Identify the key information requirements on a routine operation
- State the process, roles and responsibilities for personnel involved with a routine operation
- Recognise the importance of risk assessment of a routine operation
- Identify specific routine operation requirements for AE authorisation, conflict checking, clearance to proceed, handovers, briefing, preliminaries, execution of works, deviations, permits to work and completion

## Technical Information

Date Produced: April 2026

Pre-requisite Qualifications: SCO Core, PtW and RO must still be in date prior to completion of the training. If qualification expires, initial route must be taken.

Assessment Type: Multi Choice question paper.
